## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Noda.

As per claims 1, 3, and 4, Noda discloses a method wherein compressor 1 is stopped and then outdoor blower 6 is stopped after a designated time after the compressor is stopped. With regard to claim 1, while Noda does not specifically teach the method being for controlling noise reduction, this is simply a matter of intended use set forth in the claim's preamble, and is thus not accorded patentable weight. Also, with regard to the condenser temperature/pressure reduction recited in claim 3, this is simply a consequence of the recited method steps, which are disclosed by Noda, and thus does not patentably distinguish the claim over Noda.

### ***Allowable Subject Matter***

Claims 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
